Summery

I started programming in 2009 at the age of 17, I started programming in VB6 language and after that I started working with C++ and entered the world of OOP I started working with PHP in 2013 and after that, I got to know the CodeIgniter framework. I have been working with it for a year, I am currently expanding my programs with Laravel and I have been with it since version 4.2, and I have created programs in the fields of accounting, warehousing, and customer management. I am very interested in learning and teaching, during the week I use my free time to learn, exercise and play.
